

California High-Speed Rail Authority

# *Burbank to Los Angeles*

## *Project Section*

**Administrative Draft  
Project Environmental Impact  
Report/Environmental Impact  
Statement**

**Appendix 3.19-A  
Cumulative Project List**

**May 2020**

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being or have been carried out by the State of California pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated July 23, 2019, and executed by the Federal Railroad Administration and the State of California.

**This page intentionally left blank**

## APPENDIX 3.19-A: CUMULATIVE PROJECT LIST

This appendix provides lists of planned and approved projects and plans in each of the jurisdictions within the California High-Speed Rail Burbank to Los Angeles Project Section study area, including the cities of Burbank, Glendale, and Los Angeles. These tables contain transportation, development, utility, bridge preventive maintenance, and sewer projects. Each project listed includes a map identification number that corresponds to the location of the project as depicted on the corresponding figure in Section 3.19, Cumulative Impacts, of the Environmental Impact Report/Environmental Impact Statement. Planned and approved projects in adjacent California High-Speed Rail project sections (Palmdale to Burbank and Los Angeles to Anaheim) relevant to this discussion are also included.<sup>1</sup>

---

<sup>1</sup> As discussed in Section 3.1 of the EIR/EIS, the existing conditions baseline year for this Draft EIR/EIS is generally 2015, the time when the environmental analysis for the Burbank to Los Angeles Project Section began following issuance of the federal Notice of Intent and state Notice of Preparation for the project section. The affected environment discussions, including the descriptions of infrastructure projects and land development projects considered in the cumulative impacts analysis, describe the existing and planned conditions provided in the most recent, publicly available data as of December 31, 2017, or collected during field work conducted in 2015, 2016, and 2017.

**This page intentionally left blank**

**Table 3.19.A-1 Cumulative Projects—Transportation and Transit Projects**

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T1	Burbank-Glendale-Pasadena Airport Intermodal Ground Access Link	This project involves construction of a link between the airport and other transportation services, including construction of a new Metrolink station at Hollywood Way/San Fernando Road on the Antelope Valley Line and a link between the airport and other transportation services.	Construction in progress.	None.	City of Burbank, Hollywood Way/San Fernando Road (0.13 mi)
T2	Brighton to Roxford Double Track	This project includes approximately 10 mi of new double track on Metrolink's Antelope Valley Line between Burbank and Sylmar to eliminate the current bottleneck and improve travel times for riders.	Preliminary engineering completed in Spring 2017; Plans, Specifications, & Estimates completed in 2017. Construction TBD, dependent on funding.	No environmental document is currently available.	City of Burbank to Sylmar Neighborhood Council in the City of Los Angeles, Hollywood Way to Roxford Street (0.1 mi)
T3	Burbank Bob Hope Airport Replacement Terminal	This project will construct a 14-gate replacement passenger terminal and related facilities at Hollywood Burbank Airport (formerly Burbank Bob Hope Airport).	Final EIR approved in June 2016. Completion of NEPA environmental documentation anticipated in 2019. Design and construction phase anticipated from 2018 to 2022. Demolition of existing terminal anticipated in 2023.	Air quality.	City of Burbank, north of existing Hollywood Burbank Airport Terminal (0.03 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T4	Burbank Bob Hope Airport Station Pedestrian Grade Separation and RITC Connection	This project will design and construct a pedestrian bridge that connects the Hollywood Burbank Airport RITC and the Hollywood Burbank Airport (formerly Burbank Bob Hope Airport) Metrolink station to provide a grade-separated crossing of Empire Avenue and the railroad tracks for pedestrians traveling between the airport terminal and the station.	Draft IS/MND filed in September 2009. Project Study Report completed in September 2013.	None.	City of Burbank, Hollywood Burbank Airport over Empire Avenue to RITC Connection (0.11 mi)
T5	Metro Red Line Extension	This project would construct a new Burbank Airport–North Metrolink Station 1 mi from the existing airport terminals north of Hollywood Burbank Airport on the Antelope Valley Line (Metro Red Line) of the Metrolink system, and would extend the Metro Red Line from North Hollywood to the Hollywood Burbank Airport.	Construction on new Burbank Airport–North Metrolink Station was completed and opened to the public in May 2018. Red Line extension anticipated to be completed in 2040.	No environmental document is currently available.	City of Burbank, Metro Red Line Station in North Hollywood to Hollywood Burbank Airport (0.30 mi)
T6	I-5 Corridor Improvements - Magnolia Boulevard to Buena Vista Street	This project comprises a series of improvements to I-5 in Burbank between Magnolia Boulevard and Buena Vista Street. The project will add 2.2 mi of carpool lanes in each direction, construct a new interchange and undercrossing at I-5 and Empire Avenue, and reconstruct the Burbank Boulevard overcrossing. It will also elevate the railroad tracks near Empire Avenue and at Buena Vista Street and San Fernando Boulevard, and will improve the intersections at San Fernando Boulevard, Victory Place, and Lincoln Street.	Construction in progress; construction 72% complete as of October 2018; completion anticipated in 2021.	None.	City of Burbank, Magnolia Boulevard to Buena Vista Street (0.08 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T7	San Fernando Boulevard at Burbank Boulevard Intersection Improvements	This project would make the following improvements to the San Fernando Boulevard/Burbank Boulevard intersection: <ul style="list-style-type: none"> <li>• Flare intersection to provide additional turn lanes</li> <li>• Widen sidewalks</li> <li>• Accommodate future bicycle lanes</li> <li>• Reconstruct curb and gutter</li> <li>• Add concrete pavement and sidewalks</li> <li>• Relocate utilities</li> <li>• Acquire right-of-way</li> </ul>	Finding of Categorical Exemption under CEQA approved March 22, 2016.	None.	City of Burbank, San Fernando Boulevard/ Burbank Boulevard (0.23 mi)
T8	Burbank Channel Bikeway Regional Gap Closure	The Burbank Channel Bikeway Regional Gap Closure would construct a Class 1 bicycle and pedestrian path along the Burbank Western Flood Control Channel. The project includes bikeway treatments at Flower Street/Olive Avenue, Verdugo Road/bike path, and Providencia/Lake Street, as well as a grade-separated crossing at Alameda Avenue.	Phase I completed in 2011. Construction of Phase II anticipated between spring 2018 and spring 2019.	None.	City of Burbank, adjacent to the Burbank Western Channel, from the Downtown Burbank Metrolink Station to Alameda Avenue (0.04 mi)
T9	I-5 Corridor Improvements - Ventura Freeway (SR 134) to Magnolia Boulevard	I-5 is being widened to add 2.7 mi of carpool lanes in each direction between SR 134 and Magnolia Boulevard in Burbank and Glendale. Improvements include widening bridges, constructing new on- and off-ramps at the southbound Western Avenue interchange, enhancing soundwalls, and upgrading the storm water drainage system. A pedestrian walkway will be constructed near Verdugo Avenue.	Construction in progress; construction is 82% complete as of October 2018.	None.	Cities of Burbank and Glendale, Ventura Freeway (SR 134) to Magnolia Boulevard (0.18 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T10	Glendale Narrows Bikeway Culvert Bridge	This project involves the construction of a small bridge over a culvert to connect the Glendale Narrows to Flower Street to create a Class I Bike lane along and across the Los Angeles River. The project's length is under 1 mi.	Final IS/MND for Phase II approved May 2013. Construction of Phase I completed in 2012, and construction of Phase II completed in 2015. Engineering studies currently being undertaken for a future bridge across the Los Angeles River and the Verdugo Wash for Phase III.	None.	City of Glendale, Glendale Narrows to Flower Street (0.13 mi)
T11	Space 134 Cap Park	The Space 134 Cap Park project includes preliminary engineering studies of a freeway cap on SR 134 in Glendale. The project may interface with ramps between Pacific Avenue and Glendale Avenue and the potential east-west transit line planned between North Hollywood and Pasadena.	Space 134 Vision Plan approved in June 2013. Updated Space 134 Vision Plan approved in March 2016. Construction anticipated to begin after 2020 at the earliest.	No environmental document is currently available.	City of Glendale, Central Avenue to Balboa Avenue (0.12 mi)
T12	Beeline CNG Fueling and Maintenance Facility	This project involves the construction of a city-owned maintenance, operations, and administrative facility for the Glendale Beeline Transit system and Glendale Dial-A-Ride. The facility would be at 1749–1761 Gardena Avenue, adjacent to the HSR alignment.	Construction in progress; completion anticipated in December 2018.	None.	City of Glendale, 1749–1761 Gardena Avenue (0.04 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T13	Glendale Boulevard-Hyperion Avenue Complex of Bridges	<p>This project includes the following improvements:</p> <ul style="list-style-type: none"> <li>• Rehabilitation/seismic retrofitting of the bridges over the Los Angeles River, I-5, and Riverside Drive</li> <li>• Upgrading bridge railing on Bridges 53c-1881, 53c-1882, 53c-1883, 53c-1884, 53c-1179, and 53-1069 (no additional lanes)</li> <li>• Realignment of the I-5 northbound off-ramp.</li> <li>• Construction of an approximately 426 ft long pedestrian bridge over the Los Angeles River</li> </ul> <p>Federal Project ID: BHLS-5006(181).</p>	Final IS/MND approved in June 2015.	None.	City of Los Angeles, Glendale Boulevard to Hyperion Avenue (0.61 mi)
T14	State Route 2 Terminus Improvement Project	This project would improve the Glendale Boulevard/SR 2 terminus through reconfiguration/redesign and traffic management. It would also include neighborhood safety measures (TEA21-#413).	<p>Final IS/MND approved in April 2010.</p> <p>Construction of Phase 1A completed in November 2013.</p> <p>Phase 1B was anticipated to be completed winter 2015/2016.</p> <p>Phase 2 currently unfunded.</p>	None.	City of Los Angeles, 0.5 mi south of Branden Street to I-5/SR 2 interchange (0.50 mi)
T15	Taylor Yard Bikeway/ Pedestrian Bridge Over the Los Angeles River	The proposed project would include the construction of a multimodal bridge over the Los Angeles River between Elysian Valley on the west and Taylor Yard on the east.	<p>IS/MND circulated for public review in November 2016.</p> <p>Construction anticipated to begin in June 2018 and be completed in December 2020.</p>	None.	City of Los Angeles, over the Los Angeles River between Elysian Valley and Taylor Yard (0 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T16	North Spring Street Viaduct Widening and Rehabilitation	The North Spring Street Viaduct is a historic bridge over the Los Angeles River located 0.4 mi west of I-5. This project would rehabilitate and widen the four-lane bridge (no added lanes), add sidewalks, and upgrade bridge railings (53C0859). A high-cost-project agreement is required.	Construction in progress; completion anticipated in 2020.	Cultural resources.	City of Los Angeles, N Spring Street and the Los Angeles River (0 mi)
T17	Link Union Station (Link US) (formerly known as the Southern California Regional Interconnector Project)	Link US has several key components, including: <ul style="list-style-type: none"> <li>• New run-through tracks over US-101 to provide one-seat rides to major destinations in Southern California</li> <li>• Reconfiguration of the “throat” (station entry tracks) and “rail yard” (station arrival and boarding area)</li> <li>• A new passenger concourse with retail, food services, passenger waiting areas, and other amenities</li> <li>• A new loop track to provide operational flexibility</li> </ul> Potential accommodation of future transportation options, including the HSR system	Environmental documentation in progress. Draft EIS/EIR anticipated in spring 2018. Final EIS/EIR and Record of Decision/EIR certification anticipated in winter 2018.	No environmental document is currently available.	City of Los Angeles, LAUS (0 mi)
T18	Patsaouras Plaza	Located adjacent to LAUS, the Patsaouras Plaza Busway Station project will be a new transit busway station for the Metro Silver Line and other transit buses operating on the El Monte Busway. The design will place the busway south of Patsaouras Transit Plaza, in the median of the El Monte Busway next to US-101. The new busway station will allow buses travelling in both directions to serve LAUS with a minimum delay for passengers traveling to other destinations.	Construction in progress; completion anticipated in April 2019.	None.	City of Los Angeles, median of the El Monte Busway next to US-101 (0.07 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T19	Park 101	The Park 101 District is a visionary urban design solution to construct a freeway cap park above a 0.5 mi length of US-101 in downtown Los Angeles. The district capitalizes on an opportunity for urban revitalization at the HSR transit-oriented development at LAUS.	Planned (no date available).	No environmental document is currently available.	City of Los Angeles; Phase 1 would be from Los Angeles Street (on the east) to N Broadway (on the west), and Phase 2 would extend the park farther west to N Grand Avenue and potentially farther east past Alameda Street to Hewitt Street (0.07 mi)
T20	Regional Connector Transit Project	This new Metro Rail extension project would extend from the Metro Gold Line Little Tokyo/Arts District Station to the 7th Street/Metro Center Station in downtown Los Angeles, allowing transfers to the Blue, Expo, Red, and Purple Lines. The 1.9 mi alignment will serve Little Tokyo, the Arts District, the Civic Center, the Historic Core, Broadway, Grand Avenue, Bunker Hill, Flower Street, and the Financial District. The project will provide a one-seat ride for travel across Los Angeles County. From the Metro Gold Line, passengers will be able to travel from Azusa to Long Beach and from East Los Angeles to Santa Monica without transferring lines.	Construction in progress; completion anticipated in 2021.	Construction impacts related to bus transit, traffic circulation, pedestrian and bicycle movements, regional air quality, and paleontology. Cumulative impacts related to bus transit, traffic circulation, pedestrian and bicycle movements, and regional construction emissions.	City of Los Angeles, Metro Gold Line Little Tokyo/Arts District Station to the 7th Street/Metro Center Station in downtown Los Angeles (0.25 mi)
T21	Active Transportation Program—Little Tokyo Pedestrian Safety	This project includes pedestrian improvements in Little Tokyo. The project includes improvements to sidewalks, curb ramps/extensions, pedestrian and street lighting, street furniture, street tress, mini-roundabouts, landscaping, pedestrian gathering areas, painted colored sidewalks, traffic signals/stripping, rectangular rapid flashing beacons, shared-lane pavement markings, continental crosswalks, speed bumps, bicycle boxes, loop detectors, and medians.	Construction in progress; completion anticipated in 2020.	No environmental document is available.	City of Los Angeles, Little Tokyo (0.30 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
T22	Palmdale to Burbank HSR Section	Adjacent HSR Section extending south from Palmdale Transit Center to Burbank Airport Station	Public circulation of Draft EIR/EIS in December 2020.	Will be provided in Draft EIR/EIS document upon publication	Adjacent to Burbank Airport Station
T23	Los Angeles to Anaheim HSR Section	Adjacent HSR Section extending south from LAUS to Anaheim ARTIC transit center	Public circulation of Draft EIR/EIS in January 2021.	Will be provided in Draft EIR/EIS document upon publication	Adjacent to LAUS

ARTIC = Anaheim Regional Transportation Intermodal Center

Caltrans = California Department of Transportation

CNG = compressed natural gas

EIR = environmental impact report

ft = foot/feet

FTIP = Federal Transportation Improvement Programs

HSR = high-speed rail

I- = Interstate

ID = identification

IS = Initial Study

LAUS = Los Angeles Union Station

Metro = Los Angeles County Metropolitan Transportation Authority

mi = mile(s)

MND = Mitigated Negative Declaration

NEPA = National Environmental Policy Act

RITC = Regional Intermodal Transportation Center

RTP = Regional Transportation Plan

SCAG = Southern California Association of Governments

SCS = Sustainable Communities Strategy

SR = State Route

TBD = to be determined

US- = U.S. Route

**Table 3.19.A-2 Cumulative Projects—Development Projects**

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D1	Avion	<p>The Avion project would construct a business park on approximately 60 ac of vacant land directly adjacent to Hollywood Burbank Airport. Avion would consist of the following:</p> <ul style="list-style-type: none"> <li>• Six buildings two stories high for industrial/warehouse uses, totaling 1,014,887 sf</li> <li>• Nine buildings two stories high for creative office uses, totaling 142,250 sf</li> <li>• Two buildings one story high for retail/restaurant uses, totaling 15,154 sf</li> <li>• One hotel with 166 rooms</li> <li>• Other site and street improvements</li> </ul>	<p>Preparation of EIR in progress.</p> <p>Public review of IS/NOP ended on July 8, 2017.</p> <p>Construction anticipated to begin early 2018 and be completed by the end of 2018.</p>	<p>Potentially significant impacts identified in the IS/NOP include air quality, cultural resources, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, public services, transportation and traffic, tribal cultural resources, and utilities and service systems.</p>	<p>City of Burbank, 3001 N Hollywood Way (0 mi)</p>
D2	Golden State Specific Plan	<p>In partnership with the Authority and Metro, the City of Burbank is developing the Golden State Specific Plan. The Golden State Specific Plan will involve station area planning around the planned HSR station near Hollywood Burbank Airport. The Golden State Specific Plan will serve as the regulatory document for future land use, development, infrastructure, and public realm improvements within the 640 ac Specific Plan area.</p>	<p>Planned (no date available).</p>	<p>No environmental document is currently available.</p>	<p>City of Burbank, east and south of Hollywood Burbank Airport (0 mi)</p>
D3	Proposed Airport Hotels	<p>This project would be constructed in two phases:</p> <ul style="list-style-type: none"> <li>• <b>Phase 1:</b> A new eight-story hotel (89 ft high) with a total of 200 rooms and a total of approximately 136,400 sf of floor area</li> <li>• <b>Phase 2:</b> <ul style="list-style-type: none"> <li>– <b>Option A:</b> A nine-story 14,000 sf hotel (94 ft high) with a total of 216 rooms and a four-story parking garage</li> <li>– <b>Option B:</b> A six-story 120,000 sf office building (81 ft high) and a five-story parking garage</li> </ul> </li> </ul>	<p>City of Burbank may prepare an environmental document; no schedule is available.</p>	<p>No environmental document is currently available.</p>	<p>City of Burbank, 2500 N Hollywood Way (0.04 mi)</p>

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D4	3700 Vanowen Street	Construction of a 36,038 sf tilt-up commercial building.	In planning stage (no date available).	No environmental document is currently available.	City of Burbank, 3700 Vanowen Street (0.13 mi)
D5	Burbank Town Center	<p>The Burbank Town Center is a proposed residential/commercial mixed-use development on approximately 16.5 ac of an existing 37 ac planned development. The project would include the following:</p> <ul style="list-style-type: none"> <li>• A seven-story building with 271 residential units</li> <li>• A 15-story building with 70 residential units</li> <li>• A seven-story mixed-use building with 801 residential units and 37,135 sf of retail/restaurant space</li> <li>• A seven-story, 200-room hotel with 10,425 sf of restaurant space</li> <li>• Improvements to N San Fernando Boulevard</li> <li>• Demolition of approximately 241,000 sf of retail space, including Ikea, OfficeMax, and Corner Bakery.</li> </ul>	<p>Discretionary approvals have been requested. Preparation of an EIR in progress. IS/NOP circulated for public review on November 28, 2017. Public Scoping Meeting held on December 13, 2017.</p>	No environmental document is currently available.	City of Burbank, 600 North San Fernando Boulevard (0.14 mi)
D6	550 North Third Street Hotel Project	The project proposes a six-story hotel development with 196 hotel rooms and associated amenities on a 0.89 ac site. Approximately 10,235 sf would consist of various amenities including, but not limited to, restaurant, reception, lobby, and meeting rooms. Approximately 7,105 sf would be consist of back-of-house areas, such as administration, employee areas, kitchen, and housekeeping facilities. The project would include a single structure that would consist of six stories reaching a maximum height of approximately 68 ft situated over three levels of subterranean parking with 196 parking spaces.	<p>IS/ND circulated for public review in September 2017. Construction completion anticipated in October 2019.</p>	None.	City of Burbank, 550 N 3rd Street (0.35 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D7	First Street Village Mixed-Use Project	This project would construct three six-story buildings, to provide a combined total of 275 apartments, 18,975 sf of retail/commercial space on the ground floors, and a total of 673 parking spaces in three levels of ground-level and subterranean parking.	Final IS/MND approved in August 2016. Burbank City Council approved project in June 2017. Construction completion anticipated in 2021.	None.	City of Burbank, N 1st Street (between 1st Street and I-5), and E Magnolia Boulevard (0.09 mi)
D8	The Premier on First	The Premier on First project would be constructed in two phases: <ul style="list-style-type: none"> <li>• <b>Phase 1:</b> A 14-story building with 154 residential units and 7,968 sf of retail space, 1,727 sf of restaurant space, and subterranean and podium parking garages</li> <li>• <b>Phase 2:</b> Includes two possible development scenarios:                             <ul style="list-style-type: none"> <li>– <b>Phase 2A:</b> A 12- or 13-story hotel with a maximum of 230 rooms; a 18,544 sf conferencing center on the podium level and 6,601 sf of conference rooms on the 10th floor; 4,738 sf of restaurant space and 1,156 sf of retail space on the ground floor; and subterranean parking.</li> <li>– <b>Phase 2B:</b> An 11-story building with 158,011 sf of office space and 12,822 sf of commercial space for retail and restaurant type uses, and subterranean and podium parking garages.</li> </ul> </li> </ul>	Draft EIR circulated for public review from August 22 to October 6, 2017. Phase 1 of construction anticipated from 2018 to 2024. Phase 2 of construction anticipated from summer 2021 to summer 2024.	Ground-borne noise and vibration impacts during construction.	City of Burbank, 103 E Verdugo Avenue (0.13 mi)
D9	40 East Verdugo	New private school.	In development review and planning stage.	No environmental document is currently available.	City of Burbank, 40 E Verdugo Avenue (0.06 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D10	CCTAN/Colorado Street Mixed-Use Development	This project would a construct mixed-use development with 90 multifamily residential units, medical office space, restaurants, and activity spaces.	Final EIR approved in May 2014.	Noise and vibration, fire protection and emergency services, fire protection and emergency services (cumulative), police protection (cumulative), and utilities and service systems (solid waste) (cumulative) impacts.	City of Glendale, 507–525 W Colorado Street (0.21 mi)
D11	Los Angeles-Glendale Water Reclamation Plant Personnel Building	This project includes construction of an estimated 15,000 sf, two-story building to provide office space for Los Angeles-Glendale Water Reclamation Plant personnel	IS/MND circulated for public review in October 2017. Construction anticipated to begin in late 2018 and be completed in early 2020.	None.	City of Los Angeles, 4600 Colorado Boulevard (0.35 mi)
D12	206 West Chevy Chase Drive	Proposed 25,705 sf, five-story commercial building consisting of retail use (585 sf) at the first (ground) level, medical office use (4,750 sf) on the second level, and general offices (20,370 sf) on the third, fourth, and fifth levels. The proposal includes 81 parking spaces located on the first and second levels and four levels below-ground.	MND circulated for public review from April 7, 2017, to April 27, 2017.	None.	City of Glendale, 206 W Chevy Chase Drive (0.42 mi)
D13	The Griffith	The Griffith is a six-story building with 225 multifamily residential units, parking, and amenities on a 2.25 ac lot.	Final EIR approved May 2015. Construction complete.	Noise and vibration, traffic and circulation, recreation, recreation (cumulative), utilities and service systems (solid waste) (cumulative), fire protection and emergency services (cumulative).	City of Glendale, 435 W Los Feliz Road (0.01 mi)
D14	Glendale Link Project	This project would construct a five-story mixed-use development on 1 ac. Uses would include multifamily residential, commercial, studio space, parking, and open space.	Final EIR approved in December 2013. Construction in progress.	Noise and vibration, recreation, recreation (cumulative impacts), utilities (cumulative impacts).	City of Glendale, 3901–3915 San Fernando Road (0.13 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D15	1821 South Brand Boulevard	This project would include demolition of existing structures and construction of a new five-story mixed-use building with 38 residential units, 980 sf of commercial (office) use on the ground floor, and three levels of subterranean parking (96 spaces).	In design review.	No environmental document currently available.	City of Glendale, 1815 and 1821 S Brand Boulevard (0.13 mi)
D16	1820 South Brand Boulevard	This project would construct a six-story, 26-unit live/work development. The project includes a total of 103 parking spaces, including 46 in a tandem arrangement.	IS/ND circulated for public review from March 8, 2017, to March 28, 2017.	None.	City of Glendale, 1820 S Brand Boulevard (0.13 mi)
D17	Northeast Area Police Station Parking Garage	The Northeast Area Police Station Parking Garage Project includes the construction of a new two- to three-story parking structure with 240 parking spaces and a pre-engineered car wash on an existing parking lot at the new Northeast Police Station.	Construction anticipated to begin in January 2018 and be completed in July 2019.	No environmental document is available.	City of Los Angeles, 3353 N San Fernando Road (0.18 mi)
D18	Bow Tie Yard Lofts	This project would construct four five- to six-story buildings on 5.7 ac. The buildings would contain 419 dwelling units, commercial uses, open space, and an urban farm.	Preparation of EIR in progress. IS/NOP circulated for public review in February 2017. Public scoping meeting held March 1, 2017.	Potentially significant impacts identified in the IS/NOP include aesthetics, air quality, cultural resources, geology and soils, greenhouse gas emissions, hazards and hazardous materials, land use and planning, noise, population and housing, public services, recreation, traffic/transportation, tribal cultural resources, and utilities and service systems.	City of Los Angeles, 2750–2800 W Casitas Avenue (0.03 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D19	Taylor Yard G2 River Park Project	The Taylor Yard G2 River Park project includes development of an approximately 42-acre portion of the 250-acre Taylor Yard Complex, which was historically owned by the Union Pacific Railroad for rail maintenance and fueling. The objective of the project is to implement phased remediation and development of the brownfield site to create habitat restoration, support environmental cleanup and sustainability, and create more than one mile of direct river access to local communities.	Preliminary design phase Preparation of environmental document anticipated to be initiated late 2018 and completed in late 2019. Construction late 2019 through late 2021.	No environmental document is available.	City of Los Angeles Taylor Yard, between Los Angeles River and Rio De Los Angeles State Park (0.00 mi)
D20	Elysian Park Lofts	The Elysian Park Lofts project proposes development of a 159,800 sf mixed-use residential and commercial retail project consisting of approximately 920 residential units (including 17 live-work units), approximately 17,941 sf of retail uses, and approximately 5,465 sf of leasing offices. The project site involves demolition of the on-site buildings that are currently used for Metro vehicle and equipment storage and parking.	Preparation of EIR in progress. IS/NOP circulated for public review from November 6, 2017, to January 31, 2018. Public scoping meeting held on November 14, 2017.	Potentially significant impacts identified in the IS/NOP include aesthetics, air quality, cultural resources, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, population and housing, public services, recreation, traffic/transportation, tribal cultural resources, and utilities and service systems.	City of Los Angeles, 1251 N Spring Street and 1030–1380 N Broadway (0.09 mi)
D21	Albion Riverside Park – Park Development	The Albion Riverside Park includes development of a new park on the 6 ac site. The overall objective of the project is to develop the site and implement LID, Green Infrastructure, and BMP measures to improve the water quality of stormwater prior to discharging into the Los Angeles River and ultimately into the Pacific Ocean. The project will also provide multiple benefits to the neighborhood by creating visual linkages to the Los Angeles River.	Construction began in May 2017.	No environmental document is available.	City of Los Angeles, 1739 N Albion Street (0.09 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D22	College Station	This mixed-use development would include 770 dwelling units and 51,390 sf of commercial space on 4.92 currently vacant acres.	Preparation of EIR in progress. IS/NOP issued in June 2016. Construction anticipated to be completed in 2020.	Potentially significant impacts identified in the IS/NOP include aesthetics, air quality, geology and soils, greenhouse gas emissions, hazards and hazardous materials, land use and planning, noise, population and housing, public services, recreation, traffic/transportation, tribal cultural resources, and utilities and service systems.	City of Los Angeles, 924 N Spring Street (0.10 mi)
D23	LA Lofts Chinatown Project	The LA Lofts Chinatown Project would construct 272 condominium units with 614 parking spaces.	Final EIR approved and published in April 2007. Construction has not yet begun.	Housing and population impacts.	City of Los Angeles, 1101 N Main Street (0.14 mi)
D24	Channel 35 Studio Relocation Project	The Channel 35 Studio Relocation Project includes the design and construction of a new digital television studio within the Masonic Hall and Merced Theatre in the El Pueblo de Los Angeles Historic Park in the City of Los Angeles. In order to utilize the two-story Masonic Hall and three-story Merced Theatre for studio use, the project would require extensive structural, mechanical, electrical, and plumbing system retrofits. A ramp and elevator structure would also be installed to allow ADA access and equipment loading to all floors of the building. The project would also structurally retrofit the three-story Pico House, located directly adjacent to the Merced Theatre on the northeast.	IS/MND circulated for public review in February 2016. Construction began in June 2017 and is anticipated to be completed in June 2019.	None.	Los Angeles, 416, 420, and 424 N Main Street (Merced Theatre) (0.16 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D25	Los Angeles Union Station Forecourt and Esplanade Improvements Project	The project is located in front of LAUS and on adjacent streets. The project includes a perimeter to create a useable civic plaza and improve pedestrian and bicycle connections between LAUS and surrounding businesses and communities. The project consists of four general components: the Alameda Street Improvements, the Forecourt Improvements, the partial closure of Los Angeles Street, and the Arcadia Street El Pueblo tour bus parking.	Draft EIR circulated for public review in August 2017. Final EIR certified on March 1, 2018 Addendum to the Final EIR certified on July 26, 2018. Construction anticipated to begin in early 2020 and take approximately 7 months.	Biological resources, cultural resources, hazards and hazardous materials, and traffic and transportation impacts.	City of Los Angeles, 800 N Alameda Street (0.12 mi)
D26	Los Angeles Department of Transportation Bus Maintenance & Compressed CNG Fueling Facility	The Transportation Bus Maintenance & CNG Fueling Facility project includes demolition of an existing manufacturing warehouse, storage building, and surface parking on the 3 ac project site. The project involves construction of a 21,867 sf maintenance and operations building, a parking structure with 100 parking spaces, a CNG fueling facility, and a surface parking area for 70 DASH buses that includes a 6,829 sf service building, a service area, a fueling station, a and bus-washing bay.	MND approved in September 2006; Addendum approved in October 2011. Construction began in October 2016 and is anticipated to be completed in November 2018.	None.	City of Los Angeles, 454–462 and 506 Commercial Street and 459–461 and 503–511 E Ducommun Street (0.12 mi)
D27	Mangrove Estates Mixed Use Project	This is a generic mixed-use project proposing retail, office, and residential uses on a 5.66 ac site adjacent to the Gold Line light rail station.	Final EIR approved in April 2010. Construction in progress and expected to take 18 to 24 months, although it could occur in multiple phases.	Air quality and transportation impacts.	City of Los Angeles, 200 N Alameda Street (0.31 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D28	Los Angeles River Revitalization Master Plan	<p>The planning area for the Los Angeles River Revitalization Project is an approximately one mile-wide, 32 mile-long river corridor and five primary opportunity areas: Canoga Park, River Glen, Taylor Yard, Chinatown-Cornfields, and Downtown Industrial Area. The project would revitalize the Los Angeles River and its watershed through the implementation of four primary goals: 1) enhance flood storage, 2) enhance water quality, 3) enable safe public access, and 4) restore a functional riparian ecosystem. Two hundred and forty specific projects have been identified in the Los Angeles River Revitalization Master Plan as part of implementation of the project.</p>	<p>Final Programmatic EIR/EIS approved April 2007</p> <p>Several specific projects have been completed since 2007; additional projects will be initiated and completed based on priorities established in the Master Plan and available funding. Projects are prioritized as near term (0-5 years), near-mid (5-10 years), mid (10-15 years), mid long (15-20 years), and long-term (more than 20 years), but timing is subject to funding availability.</p>	<p>Air quality, water quality, biological resources, land use, noise, public health and safety, transportation, socioeconomic, environmental justice, and cultural resource impacts.</p>	<p>Cities of Burbank, Glendale, and Los Angeles</p> <p>Los Angeles River (0 mi)</p>

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
D29	Los Angeles River Ecosystem Restoration Project	The proposed Project involves restoring 11 miles of the Los Angeles River from approximately Griffith Park to downtown Los Angeles, while maintaining existing levels of flood risk management. Restoration measures considered include creation and reestablishment of historic riparian strand and freshwater marsh habitat to support increased populations of wildlife and enhance habitat connectivity within the study area, as well as to provide opportunities for connectivity to ecological zones, such as the Santa Monica Mountains, Verdugo Hills, Elysian Hills, and San Gabriel Mountains. Restoration includes the reintroduction of ecological and physical processes, such as a more natural hydrologic and hydraulic regime that reconnects the river to historic floodplains and tributaries, reduced flow velocities, increased infiltration, improved natural sediment processes, and improved water quality. The proposed Project also includes opportunities for passive recreation that is compatible with the restored environment.	Final EIR/EIS approved June 2016	Air quality and land use	Cities of Burbank, Glendale, and Los Angeles Los Angeles River (0 mi)

U1	Ontario Substation	This project is part of the Golden State Area Substation. With a substation agreement with the developers of the Avion development project, construction of a new 67 MVA Burbank Water and Power electrical community substation would take place in two phases: <ul style="list-style-type: none"> <li>• <b>Phase 1:</b> Two 69 kV subtransmission lines, two transformer banks, and six 12 kV feeder positions.</li> <li>• <b>Phase 2:</b> A third 69 kV subtransmission line, a third transformer bank, and three additional feeder positions.</li> </ul>	Engineering in progress; construction anticipated from 2018 to 2019. Installation of remaining feeders as needed when additional 12 kV load is developed.	No environmental document is currently available.	City of Burbank, southwest corner of Winona Avenue and Ontario Street (0.42 mi)
U2	Underground Transmission Line Construction	This project would construct a new underground transmission line to the Ontario Substation.	Engineering in progress; construction anticipated from 2018 to 2019.	No environmental document is currently available.	City of Burbank, Ontario Street from railroad tracks to Winona Avenue (0.01 mi)
U3	Overhead Transmission Line Construction	This project would rebuild an overhead transmission line to the Ontario Substation.	Engineering in progress; construction anticipated from 2018 to 2019.	No environmental document is currently available.	City of Burbank, Winona Avenue from Ontario Street to Victory Place (0.40 mi)
U4	Streetlight Series Conversion	This project includes overhead streetlight circuit construction.	Engineering and construction anticipated from 2018 to 2019.	No environmental document is currently available.	City of Burbank, Buena Vista Avenue from Winona Avenue to Glenoaks (0.67 mi)
U5	Overhead Transmission Line Construction	This project would rebuild an overhead transmission line to Ontario Substation.	Engineering in progress; construction anticipated from 2018 to 2019.	No environmental document is currently available.	City of Burbank, Victory Place from Naomi Street to Maria Street (0.34 mi)
U6	Streetlight Series Conversion	This project includes overhead streetlight circuit construction.	Construction anticipated from 2018 to 2019.	No environmental document is currently available.	City of Burbank, Buena Vista Avenue from Vanowen Street to Victory Boulevard (0.01 mi).
U7	Underground Utility District II	This project would convert an existing streetlight and electric facilities from overhead to underground.	Project approval in progress.	No environmental document is currently available.	City of Burbank, San Fernando Boulevard from I-5 to Amherst Drive (0.24 mi).

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/Adverse Effects	Location (Distance from HSR Centerline)
U8	Streetlight Series Conversion	This project includes underground streetlight circuit construction.	Engineering and construction anticipated from 2018 to 2019.	No environmental document is currently available.	City of Burbank, 3rd Street from Angeleno Avenue to Verdugo Avenue (0.35 mi).
U9	Los Angeles-Glendale Water Reclamation Plant Primary Effluent Equalization Storage	This project will construct two 2.5-million-gallon equalization tanks at the Los Angeles Glendale Water Reclamation Plant to store effluent for establishing uniform flow levels.	IS/MND circulated for public review in October 2017. Construction anticipated to begin in late 2018 and be completed in early 2021.	None.	City of Los Angeles, 4600 Colorado Boulevard (0.28 mi)
U10	Los Angeles-Glendale Water Reclamation Plant Blower Air Cleanup System	This project includes the addition of a biotrickling filter or blower air clean-up system at the Los Angeles-Glendale Water Reclamation Plant.	Categorical Exemption approved in March 2017. Construction anticipated to begin in January 2018 and be completed in April 2019.	None.	City of Los Angeles, 4600 Colorado Boulevard (0.29 mi)

kV = kilovolt(s)

MVA = megavolt-ampere(s)

mi = mile(s)

**Table 3.19.A-5 Cumulative Projects—Sewer Projects**

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
S1	Difficult to Access Reach (DAR) 03 Northeast Los Angeles/Eagle Rock/Los Feliz/ Griffith Park	The DAR03 (Difficult to Access Reaches) project will remove, repair, and rehabilitate approximately 6 mi of sewer pipelines in the Eagle Rock, Los Feliz, and Griffith Park neighborhoods of northeast Los Angeles.	Construction began in March 2017 and is anticipated to be completed by September 2018.	No environmental document is available.	City of Los Angeles, Eagle Rock/Los Feliz/Griffith Park (0.05 mi)
S2	North Outfall Sewer (NOS) Rehabilitation Unit 18 – Colorado to Doran	The North Outfall Sewer (NOS) Rehabilitation Unit 18 – Colorado to Doran project includes rehabilitation of the siphon structure; debris removal and disposal; cleaning of sewer host pipe; removal and disposal of falling tiles/bricks; post-cleaning, post-rehabilitation, and post-grouting; semi-elliptical sewer rehabilitation by sliplining and grouting; reconnection of existing house connections; reconnection of 8-inch vitrified clay pipe at various locations, and replacement of manholes	Design phase. Construction is anticipated to be completed in November 2019.	No environmental document is available.	City of Los Angeles, southeast of the SR 134/I-5 interchange in North Atwater Village, from Colorado Boulevard and Edenhurst Avenue to the west end of Doran Street (0.02 mi)
S3	Secondary Sewer Renewal Program (SSRP) P01A Riverside Drive & Dorris Place	The project consists of removing and replacing and/or rehabilitating over 6.7 mi of 6-inch, 8-inch, 10-inch, 12-inch, and 14-inch sewer lines in the Silver Lake/Central City/North Los Angeles area as part of the post-Collection System Sewer Assessment (CSSA) SSRP. The project also includes adding and modifying sewer structures, including, but not limited to: traffic control, shoring, trenching, sewer bypass, sewer cleaning, sewer closed-circuit television, temporary street resurfacing, and final pavement.	Construction is underway and anticipated to be completed by March 2019.	No environmental document is available.	City of Los Angeles, Riverside Drive and Dorris Place (0.03 mi)

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
S4	Highland Park/ Eagle Rock Primary Sewer Rehab	The project includes sewer rehabilitation in Highland Park and Eagle Rock.	Design phase. Construction anticipated to begin in July 2018 and be completed in April 2020.	No environmental document is available.	City of Los Angeles, Highland Park and Eagle Rock (0.10 mi)
S5	Secondary Sewer Renewal Program (SSRP) P17 Cypress Avenue & Division Street	The project consists of removing and replacing and/or rehabilitating over 4.19 mi of 6-inch, 8-inch, 10-inch, and 12-inch sewer lines in the Central Los Angeles area as part of the Wastewater Collection System SSRP. The project also includes adding and modifying sewer structures, including, but not limited to traffic control, shoring, trenching, sewer bypass, sewer cleaning, sewer closed circuit television, temporary street resurfacing, and final pavement.	Construction began in February 2017 and is anticipated to be completed by September 2018.	No environmental document is available.	City of Los Angeles, Cypress Avenue and Division Street (0.06 mi)
S6	North Outfall Sewer (NOS) Rehab Unit 13 – Forney to Duvall	The project involves rehabilitation of the NOS.	Design phase. Construction anticipated to begin in August 2018 and be completed in July 2020.	No environmental document is available.	City of Los Angeles, Forney Street to Duvall Street (0.19 mi)
S7	North Outfall Sewer (NOS) Rehab Unit 12 – Duvall to Humboldt	The project involves rehabilitation of the NOS.	Design phase. Construction anticipated to begin in February 2019 and be completed in January 2021.	No environmental document is available.	City of Los Angeles, Duvall Street to Humboldt Street (0.01 mi)

A

Map ID	Project Name	Description	Status/Timing	Potential Significant Unavoidable Impacts/ Adverse Effects	Location (Distance from HSR Centerline)
S8	Secondary Sewer Renewal Program (SSRP) P01B Daly Street & North Main Street	The project consists of removing and replacing and/or rehabilitating over 5.74 mi of 6-inch, 8-inch, 10-inch, 12-inch, 14-inch, and 15-inch sewer lines in the Boyle Heights and Lincoln Heights areas as part of the Wastewater Collection System SSRP. The project also includes adding and modifying sewer structures, including, but not limited to: traffic control, shoring, trenching, sewer bypass, sewer cleaning, sewer closed circuit television, temporary street resurfacing, and final pavement.	Construction anticipated to start in March 2018 and be completed by April 2019.	No environmental document is available.	City of Los Angeles, Daly Street and N Main Street (0.07 mi)
S6	North Outfall Sewer (NOS) Rehab Unit 9 – Aliso to 6th	The project involves rehabilitation of the NOS.	Design phase. Construction anticipated to begin in May 2018 and be completed in April 2020.	No environmental document is available.	City of Los Angeles, Aliso Street to 6th Street (0.18 mi)
S10	Difficult to Access Reach (DAR) 06 Northeast Los Angeles/Silver Lake/Boyle Heights	The DAR06 (Difficult to Access Reaches) project will remove, repair, and rehabilitate sewer pipelines in the Silver Lake and Boyle Heights neighborhoods of Northeast Los Angeles.	Pre-design phase. Construction anticipated to begin in June 2019 and be completed by June 2020.	No environmental document is available.	City of Los Angeles, Silver Lake/Boyle Heights (0.05 mi)
S11	Downtown and Echo Park Primary Sewer Rehab	Project includes sewer rehabilitation in Downtown Los Angeles and Echo Park.	Design phase. Construction anticipated to begin in August 2018 and be completed in December 2019.	No environmental document is available.	City of Los Angeles, downtown Los Angeles and Echo Park (0.47 mi)
